QUALIFICATIONS

Programming: Python, Java, C/C++

Data Science Frameworks: Scikit-learn, Pytorch, Pandas, Matplotlib, Seaborn

Tools: Git, Google Cloud Platform, Virtualenv

WORK EXPERIENCE

Software Developer Intern   Jun 2019 - Sep 2019
Yandex N.V. | Moscow, Russia

- Developed an **intersection finding algorithm** for A/B testing to find and fix statistically dependent experiments.
- Refactored **key data source** for recommender system to improve the ability to modify it in A/B tests.
- Developed functional testing system for one of services of product.

INDEPENDENT PROJECTS

DeepModerator   Nov 2018 - present

- Designed and developed the application to simplify forum/social network toxic comments moderation in collaboration with teammate.
- Tested multiple ML models for toxic comments detection using ROC-AUC as metric.
- To increase quality of detection for each forum independently we utilized **transfer learning** (context independent embeddings, BERT), **active machine learning** (human-in-the-loop) and automatic data collection & interpretation.
- Written in Python and deployed on Google Cloud Platform.

HyperoptSearchCV — github.com/DrMatters/hyperoptsearchcv   Jan 2019

While preparing for competition **developed** a Python module which allows to use Hyperopt with scikit-learn pipelines. Provides interface similar to GridSearchCV of scikit-learn.

COURSES

Deep Learning Specialization   2018
Coursera | Deeplearning.ai
Certificate - Average grade achieved: 99%.
Machine learning   2018
Coursera | Stanford & Andrew Ng
Certificate - Grade achieved: 98.8%.

EDUCATION

Master's degree, Information Systems and Technology   2019 - present
Bauman Moscow State Technical University | Moscow, Russian Federation

Bachelor degree, Information Systems and Technology   2015 - 2019
Bauman Moscow State Technical University | Moscow, Russian Federation
